

## A Scoping Review of Literature on Sport Coach Education Programs: An International Perspective

---

### Angola

There is no national or Olympic coach education system. Different accreditation programs exist for Angolan coaches.

- International Coaching Enrichment Certificate Program, organized by the American Olympic Committee.
- General Course of Applied Sports Science, offered by the University of Barcelona.
- Training program for Football coaches promoted by the Angola Football Academy.
- Training program for athletics coaches, promoted by International Athletics Federation.

### Requirements to coach

Article 33 from the "Law of Sport" (1998) defines that the exercise of teaching technical activities in the field of sport (coaching) is conditional on the possession of adequate qualifications, and a certain frequency in attending certification programs. However, there is no indication of any type of certification program or what kind of qualifications are necessary for sports coaching.
